**Subject:** Microsoft case should be settled

This case should be settle at once. We need to move forward not backward. This case was brought upon Microsoft because they would not give money to politicians in Washington. Why is every time the USG decides to help us we get screwed?

Are the prices of computers going up or down? Down is the correct answer and not only are they going down but you get more for your money. Name one other industry where that is happening?

This case has been a total waste of tax payers dollars. The only real reason the states will not settle is because of poor fiscal policy they are broke. And look here, Microsoft has 40B in cash...so lets go steal it. Your no different then criminals but since you make the rules so your always right.

I vote and the best policy is to vote out everyone who is in office. Ross Perot said it best in 1990, " It's time to clean the shit out of the barn".
